Insights

1. **High Sales Amount:** With 16.01M in Total Sales and 112.65K product sold, the platform handles high-scale transactions.
2. **Leading Categories:** The "Bed, Bath Table" and "Health & Beauty" categories are the primary revenue drivers
3. **Customer Sentiment:** While the average rating is decent at 4.09, there is a significant volume of 1-star reviews(11.42K).
4. This suggests that while the majority are happy, a specific segment of customers is highly dissatisfied.

Recommendations

1. **Logistics Bottlenecks:** There are 16K late dispatches, which is a huge number. This is likely the root cause of the 7,827 late deliveries
2. **Shipping Timelines:** It takes an average of 3.22 days just to hand over the package to the carrier. Reducing this "Time to Carrier" could significantly improve customer satisfaction.
3. **Delivery Duration:** An average delivery time of 12.50 days is relatively high for modern e-commerce. The scatter plot suggests that lower-priced items might be suffering from longer wait times.

Summary

1. This dashboard analyzes the performance of the Olist E-Commerce marketplace, focusing on sales trends, logistics efficiency, and customer satisfaction.
